

CSE 427 Fall 2025

Quiz-1*

Time – 25 minutes

Name: _____ ID: _____ Section: _____

Consider the following dataset:

Height	Favourite Color	Gender	Weight
1.6	Blue	Female	Obese
1.6	Red	Male	Not Obese
1.5	Red	Male	Obese
1.8	Red	Female	Not Obese
1.5	Green	Female	Obese
1.4	Blue	Male	Not Obese

You are asked to create a decision tree. Find the root node (Attribute) of the tree. [15]

- For the height attribute calculate gini for the first two average values. Compare these gini values with the other two attributes and make your decision.

Try to complete the calculation within one page.

CSE 427 Fall 2025

Quiz-1**

Time – 25 minutes

Name: _____ ID: _____ Section: _____

Consider the following dataset:

Height	Favourite Color	Gender	Weight
1.6	Green	Female	Obese
1.6	Green	Male	Not Obese
1.5	Red	Female	Obese
1.8	Red	Female	Not Obese
1.5	Green	Female	Obese
1.4	Blue	Male	Not Obese

You are asked to create a decision tree. Find the root node (Attribute) of the tree. [15]

- For the height attribute calculate gini for the last two average values. Compare these gini values with the other two attributes and make your decision.

Try to complete the calculation within one page.

CSE 427 Fall 2025

Quiz-*1

Time – 25 minutes

Name: _____ ID: _____ Section: _____

Consider the following dataset:

Height	Favourite Color	Gender	Weight
1.6	Blue	Male	Obese
1.6	Green	Male	Not Obese
1.5	Red	Male	Obese
1.8	Red	Female	Not Obese
1.5	Blue	Female	Obese
1.4	Blue	Male	Not Obese

You are asked to create a decision tree. Find the root node (Attribute) of the tree. [15]

- For the height attribute calculate gini for the 3rd and 4th average values. Compare these gini values with the other two attributes and make your decision.

Try to complete the calculation within one page.

Name: _____ ID: _____ Section: _____

Consider the following dataset:

Height	Favourite Color	Gender	Weight
1.6	Blue	Female	Obese
1.6	Green	Male	Not Obese
1.5	Blue	Male	Obese
1.8	Red	Female	Not Obese
1.5	Green	Female	Obese
1.4	Blue	Male	Not Obese

You are asked to create a decision tree. Find the root node (Attribute) of the tree. [15]

- For the height attribute calculate gini for the 1st and last average values. Compare these gini values with the other two attributes and make your decision.

Try to complete the calculation within one page.
